TONY NICOLA

WEB DEVELOPER

Web Developer with a special skill for building relationships. Brings a uniquely user-centered focus and drive to every web/software project worked on to create a memorable experience.

Selected Projects:

Healthy Potatoes App: [Code](#) [Website](#)

MERN stack (MongoDB, Express, React, and Node.js) using password hashing for CRUD methods. Pulls movie/director information from MongoDB API. Allows you to change user information as well as favorite/remove movies once logged in. Hosted on Heroku.

Pokedex: [Code](#) [Website](#)

jQuery website that pulls and displays data on different Pokemon from pokeapi.co.

Discord bot: [Code](#)

Discord bot that when given commands will: insult friends, praise friends, random gif, or search for a gif through various APIs. Built with Javascript.

Meetup: [Code](#) [Website](#)

Serverless web application built with React using test-driven development technique (TDD). Application uses the meetup API and AWS.

Selected Experience:

ASF, LLC Data Conversion Specialist Aug 2018 - Jun 2019

- Created over 30 custom contracts/templates with HTML/CSS.
- Performed QA testing on various platforms.
- Created and maintained company wide Jotforms using CSS.
